

How to	Compare current observations or forecasts to historical events
Description	Step by step description of how to perform a specific task in ROWS.
Comments	The <i>italic</i> phrases correspond to the red markings in the screenshots. Please be aware that the screenshots may deviate slightly from the application
version	2016-01

For some locations historical events can be overlaid over current events for comparison.

Overview of steps

1. Find a location with historical events present (at the moment of writing only Jingellic (401201A) and Cheshunt (403227A)) and open a plot. This could be both observed data and model output.
2. Click the chest drawer icon to open the *Historical Events* selection display.
3. Select a historical event.

- ad 3. Select a historical event from the list. You can shift it back and forth in time to improve the fit. If you close the selection display, the event will remain visible throughout ROWS.
