

How to	Peak Heights vs Travel Time
Description	Step by step description of how to perform a specific task in ROWS.
Comments	The <i>italic</i> phrases correspond to the red markings in the screenshots. Please be aware that the screenshots may deviate slightly from the application
version	2015-02

Overview of steps

1. Activate the Peak Heights vs. Travel Times Display with the icon on the top of the control pane
- ad 1. Activate the Peak Heights vs. Travel Times display with the icon ($f(t)$) at the top of the control pane. The Peak Heights are depicted on the horizontal axis; the Travel Times are on the vertical axis. All the options described before, apart for setting a regression equation, apply to the peak height vs. travel time relationships.

Color, style and size of the visualized events in the display are pre-configured and identical to the scatter plot display. The plot has a title showing the support and forecast location names.
